EDUCATION

INDIANA UNIVERSITY BLOOMINGTON   United States
Masters: Data Science GPA: 3.7/4.0   **August 2023 – May 2025**
Relevant Coursework: Statistics, Machine Learning, Advanced NLP, Database Technologies, Information Visualization

VELLORE INSTITUTE OF TECHNOLOGY   India
Bachelor's: Computer Science and Engineering, GPA: 3.8/4.0.   **June 2019 – May 2023**

WORK EXPERIENCE

Candid   United States
Data Science Intern   **May 2024 – December 2024**

- Developed scalable ETL pipelines using Python and SQL Server, migrating over 10M records and reducing processing time by 30%.

- Implemented advanced anomaly detection using Machine Learning, enhancing data integrity by 40% through identification and resolution of data inconsistencies.

- Utilized PySpark and Power BI to perform in-depth analysis and create interactive dashboards uncovering key insights that informed strategic decision-making and improved data-driven initiatives across cross-functional teams.

eProtons   Remote
Data Analyst Intern   **October 2022 - February 2023**

- Optimized PostgreSQL databases and SQL queries to efficiently manage and retrieve large-scale energy consumption data, enhancing data processing speed by 25% and supporting advanced deep learning and predictive modelling initiatives.

- Accelerated data processing efficiency by 5x through the implementation of distributed Spark clusters on AWS, achieving a predictive accuracy improvement of 7%.

- Facilitated with insights by conducting advanced statistical analyses, including hypothesis testing and regression modelling, to identify key business trends and drive strategic decisions.

Mukham Pvt Ltd   India
Data Analyst Intern   **June 2022 - November 2022**

- Developed advanced anti-spoofing algorithms using convolutional neural networks, reducing fraudulent access attempts by 50% and enhancing security for client organizations.

- Integrated geolocation analytics and time-series analysis into access control systems, improving location-based authentication accuracy by 35% and reducing unauthorized access incidents by 20%.

- Enabled facial recognition algorithms using transfer learning techniques, increasing recognition accuracy by 25% under diverse conditions and reducing false positives.

PROJECTS

- **Google Ads Search Optimization Project:** Focused on improving Google Ads' search algorithms to enhance targeting accuracy and ad performance that involved analyzing over 5 million search queries and ad data records using Spark and SQL to refine ad targeting and bidding strategies, thereby optimizing ad relevancy.

- **Federated NER for Invoice Optimization:** Developed a federated learning-based Named Entity Recognition system using LayoutLM and Tesseract 4 for efficient invoice processing, achieving significant accuracy.

- **Advanced Face Recognition with Deep Learning and HOG:** Developed a face recognition system using the Histogram of Oriented Gradients and DL to enhance identification accuracy. Techniques included facial feature alignment & encoding with neural networks, followed by classification with a linear SVM to match identities efficiently.

- **Meta-Kaggle:** Analyzed the meta-Kaggle dataset using Power BI, Matplotlib, ggplot2, and Seaborn to uncover temporal trends in data science practices, languages, and techniques, providing insights into the evolving data science landscape.

SKILLS

- **Languages & Databases**: Python, R, SQL, PySpark

- **Libraries and Frameworks:** TensorFlow, Pandas, NumPy, Matplotlib, Scikit-learn, SciPy, Keras

- **Visualization and Analysis:** Power BI, Tableau, Gephi, Matplotlib, Seaborn, EDA, Statistical Modeling.

- **ML:** Deep Learning Techniques (CNN, RNN/LSTM), Supervised Learning Algorithms (Linear Regression, Logistic Regression, Decision Trees, Random Forest, Boosting, SVM, and Naive Bayes), Clustering Techniques, and Time-series Forecasting Techniques, A/B Testing, Hypothesis Testing. Predictive Modelling, Reinforcement Learning, ETL Pipelines, Anomaly Detection.

- **NLP:** NLTK,Spacy,HuggingFace,BERT

- **Statistical Analysis:** Hypothesis Testing, ANOVA, Chi-Square, Predictive/Descriptive Analytics
